EXPERIENCE

Amazon, Seattle — Software Development Engineer 1

August 2021 - November 2022

Part of the Alexa Shopping organization. Helped improve customers shopping related conversations with Alexa by allowing for more natural conversations.

- Maintained backend systems that were responsible for orchestrating Alexa shopping conversations
- Lead several projects of designing and implementing services that leveraged AWS technologies
- Mentored an intern over the Summer and built a notification system that improved our customers' experience.

Seattle Performance Medicine, Seattle — Software Developer Contractor

December 2021 - January 2022

- Helped fix issues that were causing their administrative software to crash.

Amazon, Seattle — Software Development Engineer Intern

July 2020 - September 2020

Spent the Summer as an intern for the Kindle Direct Publishing organization

- Built a microservice in AWS that would allow the team to migrate from legacy systems to better architected systems.
- Took part in a company Hackathon that involved building an Alexa Skill.

EDUCATION

University of Washington, Tacoma — Computer Science & Systems

June 2017 - July 2021

Received a Bachelors of Science in Computer Science and systems with a 3.6 GPA. Degree mainly focused on low level computer architecture.
